募集要項

Job Description:

Lead system planning and proposal to design.

Responsible for proposal activities and basic design for cutting-edge projects in the consumer field, such as data POS for beverage vending machines, food consumption prediction systems, and SCM visualization services. Serving as the overall lead for pre-sales and project promotion, he will be responsible for the overall direction and quality control of the project.

Promote package development

- Utilize industry-standard packages and existing solutions to lead customization and expansion according to customer requirements
- In particular, as an upstream SE for consumer systems such as PoS payment terminals, you will be responsible for the design and oversight of the entire system

Collaboration with related companies

- Accurately understand the requirements of clients (major beverage, vending machine, distribution, food industry, etc.) and promote smooth system construction in collaboration with technical teams and offshore partners
- Contribute to the success of projects through project management, technical evaluation, quality assurance, etc.

スキル・資格

[Requirements] Please apply if you meet any of the following requirements:

- Practical experience in the entire process from proposal to design of retail and consumer system development (EC, POS, payment, SCM, etc.) -
- Experience in upstream design of consumer-related products such as PoS payment terminals

[Preferred conditions]

- Knowledge and experience in related fields such as aviation, airports, and ports
- Project experience for major IT vendor clients
- System proposal and design experience in multiple industries (beverages, vending machines, food, retail)
- Offshore collaboration experience in global projects
