募集要項

As a systems engineer for the logistics field, you will be responsible for the following tasks:

- Communicate directly with logistics and warehouse-related customers and promote basic and detailed design work.
- * After design, you will communicate specifications to the appropriate department in the project team, which is made up of implementation engineers offshore in Vietnam, and manage project progress and connect to offshore development.
- Build ongoing customer relationships by reviewing and inspecting deliverables before release to customers and providing operational support after release.

スキル・資格

[Required]

- ・ 3+ years of experience in system development as a systems engineer.
- ・ Experience in basic or detailed design.

[Welcome]

- ・ Experience in system development in the logistics field (logistics, warehouse, etc.)
- ・ Experience with WMS (warehouse management system)

- Business knowledge of logistics
 - Experience in project management as a leader, experience in mentoring and training young people
 - Experience in offshore development
 - Experience as an IT architect
