募集要項

Join a high impact data analytics and platform team inside a global technology organization that reaches millions of users every day across e-commerce, fintech, telecommunications, media, and more. Working with massive real world marketplace data, you will help design large scale data platforms, build advanced analytics and AI solutions, and tackle challenges like fraud detection that directly affect customers and business growth. Your work will sit at the center of decision making, turning data into smarter strategies, better products, and real results seen by people around the world.

Position Details

- Design and deploy different clusters with large numbers of nodes, considering running cost, redundancy, capacity, etc.
- Verify and introduce new solutions to improve functionality and performance.
- Standardize and automate service management.
- Monitor, troubleshoot, and maintain critical production environments.

スキル・資格

- Strong Linux/Unix system administration skills.
- Experience in VMware environments (ESXi, vCenter Server).
- Experience in Nutanix environments (AHV, AOS).
- Understanding of virtualization and cloud computing.
- Proficiency in one or more of the following: Python, Shell scripting.
- Experience in automation and configuration management using Chef, Ansible, and Terraform.
- Experience with CI/CD tools (e.g., Jenkins, CircleCI).
- Experience with monitoring and troubleshooting incidents.

Desired Qualifications

- Experience with cloud platforms (e.g., OpenStack, AWS, Azure, GCP).
- Experience and working knowledge of IP networking systems and protocols.
- Web application development experience.
- Scrum Master or Project Manager experience.
- Experience in service operations with Docker and Kubernetes.
- Over 5 years of experience managing one of the following products: MySQL, Cassandra, Oracle, Couchbase, Hadoop, or Kafka.
