募集要項

■ Job Title

Data Center Operations Engineer (Night Shift) – Japanese Required

■ Overview

We are seeking a hands-on Data Center Operations Engineer to support operations in a live data center environment, including night shifts.

This role requires **practical Japanese communication skills** and the ability to work effectively in an on-site operational setting.

Candidates without prior experience are welcome if they have a strong interest in IT/infrastructure and are willing to work in a hands-on environment.

■ Responsibilities

- Perform data center operational tasks (e.g. escort, access support, basic physical work)
- Handle incident response and initial troubleshooting based on procedures
- Communicate with on-site stakeholders and internal teams in Japanese
- Follow operational workflows to ensure stable service delivery
- Support documentation updates and operational improvements

■ Position

Data Center Operations Operator (Night Shift)

■ Location

Data Center in the Toyosu area, Koto-ku, Tokyo
Detailed address will be provided during the interview

■ Job Description

You will be responsible for night shift operational support at a data center that operates 24/7, 365 days a year. Even candidates with no prior experience can learn the job through manuals and on-the-job training (OJT).

Main Responsibilities

- Manage entry and exit access to the data center
- Handle visitor reception and check-in
- Receive deliveries and equipment (package handling)
- Perform basic patrols of the server room
- Verify work requests and applications
- Communicate with relevant departments
- Input work logs (basic PC operations required)

No specialized server-related tasks are required

■ Working Hours

Night shift (12-hour shifts)

Example:

20:00 – 08:00 (with breaks)

- Shift-based schedule
- Approximately 14–16 working days per month

■ Shift Example

- 2 days on → 2 days off rotation

スキル・資格

■ Requirements (Must Have)

- **Business-level Japanese (must be able to handle on-site communication, instructions, and reporting)**
- Strong interest in IT / infrastructure / data center operations
- Ability to work night shifts (**core part of the role**)
- Hands-on mindset (comfortable with operational and physical tasks)

■ Preferred

- Experience in IT support, infrastructure operations, or data center environment
- Service Desk experience
- Experience working in international environments

■ Additional Information

This is a **stable long-term project** offering hands-on experience in a real data center environment.

Ideal candidates are practical, detail-oriented, and comfortable working in an operational role.
