募集要項

About the Company

Your opportunity to join a cutting-edge, AI-native company in Tokyo!

This is a unique chance to delve into the AI field and make a real impact. We are actively seeking a talented TPM to partner with elite engineers and product managers to turn infinite possibilities into new global standards.

Who are you

- An experienced Frontend infrastructure designer, implementer, and operator.
- You will be excited to work on massive and global projects.
- Passionate about the AI industry and dedicated to leveraging technology for real-world impact.

Why you should apply

- Unique AI Native Product
- Frontier Tech & Untapped Industry Potential
- Diverse Team
- Hybrid working Style

スキル・資格

Requirements

- B2B SaaS Experience: Proven track record as a Product Manager in the B2B SaaS space.
- Project Leadership: Experience in product/service planning, new business development, or DX (Digital Transformation) projects.
- AI/ML Expertise: Experience leading projects that leverage machine learning or data science—from initial proposal through development, operation, and service implementation.
- Foundational Experience: Experience building a service from the ground up.
- Industry Knowledge: Practical knowledge or experience in the construction industry or on-site operations (personal interest/side projects also welcome).
- Design & UX: Hands-on experience or strong knowledge in Web UI/UX design and architecture.
- Technical Background: Practical knowledge of software development (personal coding experience is highly valued).
- Business Acumen: Experience or knowledge in business development and marketing.
- Language Skills: Business-level communication in English or Korean.
