募集要項

About the Company

Your opportunity to join a cutting-edge, AI-native company in Tokyo!

This is a unique chance to delve into the AI field and make a real impact. We are actively seeking a talented AI Engineer to design, develop and operate CV algorithms, Machine Learning models, including CNNs and Transformers, and pipelines at

scale, for both batch and real-time use cases.

Who are you

- An experienced AI/ML Engineer
- You will be excited to work on massive and global projects.
- Passionate about the AI industry and dedicated to leveraging technology for real-world impact.

Why you should apply

- Unique AI Native Product
- Frontier Tech & Untapped Industry Potential
- Diverse Team
- Hybrid working Style

スキル・資格

Requirements

- 4+ years in software development in a fast-paced tech environment
- 4+ years of experience building Machine Learning/Computer Vision models in production settings. Your role is not just the research and experimentation, but also to deploy models to a production environment.
- You’re extremely comfortable with Python and deep learning frameworks such as Pytorch / Keras/Tensorflow (strong requirement).
- Deep understanding of machine learning concepts, algorithms and techniques (computer vision models, GANs, etc.)
- Strong understanding of LLMs and Diffusion models (Stable Diffusion, Llama, Mistral, LoRAs, fine-tuning, etc.)
- Able to experiment and stand-up existing open source models in production systems.
- Able to curate synthetic data.
- Able to optimize ML models for hardware (GPU/CPU optimization, etc.).
- A strong problem-solver with the ability to tackle complex technical challenges, providing innovative solutions and contributing to the product development process.
- Strong communication and leadership abilities.
- Japanese: JLPT N3+ (Able to communicate internally)
