募集要項

About the Company

Your opportunity to join a cutting-edge, Entertainment company in Tokyo!

This is a unique chance to delve into the Entertainment field and throw yourself to the Japanese subculture. We are actively seeking a talented SRE to engage themselves in the automation of systems and attend to system failures as well as carry out

development to improve the reliability, performance, and scalability of its systems moving forward.

Who are you

- An experienced SRE/DevOps with a track record of handling high-traffic loads.
- You will be excited to work on the international team.
- Good Communicator.

Why you should apply

- Team Diversity
- Hybrid Work Policy: 2 days in-office per week; the company subsidizes home Wi-Fi expenses.
- Flexibility & Culture
- Clear Career Paths

スキル・資格

Requirements

- Bachelor's degree in Computer Science or equivalent practical experience
- Ability to work independently, learn quickly, and proactively collaborate
- Strong written and verbal communication skills
- Strong problem solving and troubleshooting skills
- Ability to work calmly under pressure (such as during a production outage)
- Experience with at least one public cloud platform
- Experience with at least one programming language (pref Python, Golang, or Javascript/Typescript)
- Familiarity with Linux administration and shell scripting

Preferred Qualifications

- Experience with monitoring and infrastructure tooling (Datadog, Pagerduty, Terraform, CircleCI)
- GCP design and administration experience
- Understanding of networking principles and protocols
- Ability to write clear, concise, and informative documentation
- Experience in developing and operating large-scale web applications
- Experience collaborating with product managers and designers
- Candidates who are authorized to work in Japan without requiring visa sponsorship.

Bonus Points!

- AWS design and administration experience
- Kubernetes design and administration experience
- Experience with Docker, containerization, and microservice architectures
- Experience with Stripe or other payment processors
- Experience designing, implementing, and maintaining deployment tooling (canary, blue/green)
- Strong communication skills in Japanese, both written and verbal
- Passion for efficiency, scalability, and technology in general
