募集要項

Our client is a Japan-based global technology company primarily engaged in the development, manufacturing, and sale of high-precision, high-performance plastic engineering components, semiconductor peripheral equipment, and optical/LED products. Founded in 1962, the company serves various industries including Semiconductor, Automotive, Office Automation, and Life Sciences. Join them and be a part of an ever-growing team!

Job Descriptions

- Responsible for detailed mechanical design and drafting work of IC Socket as per customer requirements
- Generate and prepare detail of design drawing, BOM, within project schedule.
- Work closely with machining supplier and provide good solutions for drawing issue
- Ensure components and assemblies adhere to applicable socket functioning

- Provide detailed accumulative tolerance analysis on design works.
- Verify customer package drawing with existing socket drawing

Job Requirements

- Possess min Diploma or Degree in Engineering
- Min 3 years in Semiconductor or equivalent industry
- Required skills in 2D, 3D, CAD, Solidworks, MS Office
- Analytical design skill in problem solving related to socket issue
