募集要項

We are looking for a to help design, analyze, and enhance our software systems while working closely with business users and development teams.

Responsibilities:

- Review and assess existing systems to identify gaps and opportunities for improvement

- Gather and analyze business and functional requirements

- Work closely with stakeholders to understand user needs and propose effective solutions

- Prepare clear documentation such as system specifications, integration flows, and test scenarios

- Coordinate with developers throughout the development and implementation process

- Support system testing, deployment, and continuous improvement initiatives

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field

- 2-3+ years' experience working as a System Analyst or in a similar role

- Strong understanding of the software development lifecycle and system documentation

- Hands-on experience with business applications and enterprise systems

- Basic knowledge of programming or scripting (e.g., JavaScript, SQL, or similar languages)

- Ability to communicate effectively with both technical and non-technical teams

Interested candidate, please submit your most recent resume in English by simply clicking "APPLY NOW'
