募集要項

« Job Description & Position Highlights »

- Provide technical support for financial data management products, including customer support and troubleshooting and resolving issues
- An environment where you can expand your knowledge by collaborating with global teams and build an international network
- Enhance your analytical and problem-solving skills by tackling complex technical challenges, leading to career growth
- Work flexibly with a hybrid work model that includes remote options, and build your career at a global company

【Job Responsibilities】

EDM is a part of Gresham and provides Enterprise Data Management Solutions for Banks, Asset Managers, Hedge Funds, Insurance companies, Software companies and Treasury functions in large institutions. With offices in EMEA, North America, APAC and India. EDM has a global reach and increasingly clients require work to be carried out remotely from their main office.

<The Impact>

The Support Role in APAC for our Solutions business offers several impactful opportunities for individuals starting their careers in the company. Here are some key impacts of this role:

Building a global network: As part of the Support Role, individuals become part of a global community. They have the opportunity to connect with mentors, peers, and teams from around the world. This network enables them to access a wealth of knowledge and support, fostering personal and professional growth.

Knowledge sharing and collaboration: In the Support Role, individuals are encouraged to share their knowledge and collaborate with colleagues. This collaborative environment allows for continuous learning and the exchange of ideas, contributing to individual and team development.

Skill development: The Support Role in APAC offers valuable opportunities for skill development. Individuals learn how to effectively troubleshoot technical issues, provide support to clients, and communicate complex information in a clear and concise manner. These skills are transferable and can be beneficial for future career advancement.

<Job Responsibilities>

- Become an expert in all facets of supported financial products
- You will be responsible to provide advanced technical support to clients using the EDM application
- Provide outstanding client services by presenting timely and positive resolutions to clients across all aspects of application support
- Effectively and efficiently troubleshoot client issues to resolution and escalate as needed, work with internal groups to document issues, and deliver effective solutions
- Monitor all incoming support channels to address client inquiries quickly and efficiently, and manage multiple requests simultaneously
- Maintain multiple client-reported questions or issues, and document written and verbal communication in our internal CRM system
- Work directly with senior managers on a regular basis and collaborate with colleagues across business lines and regions
- You will contribute to the development and maintenance of product documentation, including user guides, troubleshooting guides, and knowledge base articles.
