募集要項

This role is a Senior Full-Stack Software Engineer position focused on building and maintaining enterprise-scale internal applications using Python and modern JavaScript frameworks in a fully remote, agile environment. It offers long-term stability, international collaboration, and strong potential for permanent conversion, with meaningful ownership over end-to-end technical solutions.

Client Details

The company is a well-established organization in the financial services industry, recognized for its technical expertise and innovative approach to problem-solving. It operates as a large organization with an emphasis on delivering cutting-edge technology solutions to meet the needs of its clients.

Description

- Develop, enhance, and maintain enterprise-scale internal applications using Python, with Pandas and NumPy strictly required for data processing and analysis
- Build and support full-stack solutions using modern JavaScript frameworks alongside Python-based backend services
- Translate complex business and data requirements into clear, reliable, and scalable technical implementations in an agile/Scrum environment

- Ensure high code quality and system reliability through automated testing, code reviews, and clear technical documentation

Job Offer

- Competitive annual salary
- Full remote
- Opportunity to work in the financial services industry in Tokyo.
- Collaborative and innovative work environment.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

スキル・資格

- Strong experience in Python, with Pandas and NumPy as core, hands-on requirements for data processing and analysis
 - Proven full-stack engineering background, able to deliver maintainable solutions from backend logic to frontend interfaces
 - Self-driven and analytical, with the ability to understand business context and translate requirements into effective technical outcomes
 - Comfortable working in an agile, collaborative environment, communicating clearly with both technical and non-technical stakeholders
 - Ability to communicate in English or Japanese
-

会社説明

The company is a well-established organization in the financial services industry, recognized for its technical expertise and innovative approach to problem-solving. It operates as a large organization with an emphasis on delivering cutting-edge technology solutions to meet the needs of its clients.
