**Responsibilities:**

- Service and feature architecture design and review
- Service infrastructure design, construction, and operation
- Optimizing system reliability, performance, and cost.
- Development and operation of software to automate operations and monitoring.
- Incident response and on-call staffing, and operational improvements through post-mortem analysis.
- Improving development productivity and developer experience through the development and testing environment.
- Development of a CI/CD infrastructure to shorten lead times
- Tech stack used: Terraform, Ansible, CircleCI, Jenkins, Datadog, CloudWatch, Kibana, Athena, PostgreSQL, Microsoft SQL Server, Python, Java

**Why should you apply?**

- Full 100% remote work is allowed
- Work life balance is emphasized
- They place importance to offer compensation benefits such as flexible working hours (Core time 10 am to 3 pm)
- Casual Office Attire is allowed
- Healthy working environment, non-blaming culture, teamwork environment where they investigate causes and think about measures to prevent recurrence.

**Company Details:**

A company that has been developing and selling a multi-device platform to corporate clients for over 10 years with the No. 1 market share in the industry.

The service allows secure access to business resources such as e-mail and schedules used on the company's own developed forms, from outside the office or home, on PCs, smartphones, etc.

**Working Hours:** 9:30 - 18:30 (Mon-Fri), Core hours (10:00 – 15:00)

**Working Style:** Remote (one day in-office per month)

**Holidays:** Two days off per week (Saturdays, Sundays, and holidays), Paid vacation, New Year's holiday, special leave, summer vacation

**Services/Benefits:** Full social insurance, health insurance, welfare pension, employment insurance, workers' compensation insurance, commuting allowance, late-night overtime allowance, flexible working hours, hybrid work allowance, condolence allowance, babysitting support, side job opportunities, book purchase support, internal Japanese language lessons,

**Interview Process:** Document screening → Two interviews → Offer

**スキル・資格**

- Infrastructure & Networking: At least 1 year of experience in infrastructure design with a basic understanding of networking and security (HTTP, TCP/IP, DNS).
- Development Skills: Familiarity with object-oriented programming and collaborative development using pull request-based workflows.
- Cloud & Automation: Experience or knowledge of cloud platforms (e.g., AWS) and infrastructure automation tools such as Ansible or Terraform is preferred.
- SRE & Communication: Understanding of SRE principles and willingness to communicate in English in a team environment.

Japanese: N2 level

English: High intermediate level
