募集要項

transformation by turning complex market data into actionable business insights.

Why you should apply:

- Be part of a diverse, fully English-speaking global team and collaborate regularly with international stakeholders.
- Own end-to-end data analytics and directly contribute to critical, large-scale business decision-making processes.
- Grow your career within an advanced digital transformation environment using modern BI and cloud analytics tools.
- Enjoy the flexibility of a modern hybrid work structure balancing both remote work and office collaboration.

Responsibilities:

- Extract, clean, and transform data from both internal systems and relevant external sources to prepare it for analysis.
- Translate complex business requirements into clear, data-driven insights and actionable business recommendations.
- Build a deep understanding of the local product portfolio and apply strong business context to interpret analytical results.
- Create clear and compelling data stories using modern visualization tools and presentations for international stakeholders.
- Ensure high analytical accuracy by consistently validating business logic, data integrity, and core hypotheses

Company overview:

A world-renowned global industry leader operating across international markets, recognized for its premium product portfolio, highly diverse and English-centric corporate culture, and continuous investment in digital infrastructure.

Working hours: 9 : 00 ~ 17 : 30, Mon-Fri

Work Location: Tokyo (Hybrid)

Working Style: Work from Home 1-2days/week

Holidays: Saturday, Sunday, National Holidays, Year-end and New Year Holidays, Paid Holidays, Other Special Holidays

Services/Benefits: Social insurance, DC Pension Plan, Transportation Fee, Test payback system, and more

スキル・資格

- Hold 4 to 6 years of professional experience as a Data Analyst with a proven track record of translating user needs into insights.
- Possess strong hands-on skills in Power BI, Excel (including Pivot Tables and Power Query), and PowerPoint for data storytelling.
- Demonstrate solid technical proficiency in SQL for data extraction and Python for data cleaning and automation.
- Exhibit strong business insight and the ability to comfortably bridge the gap between technical data and business stakeholders.

English-business level

Please note: This position requires an immediate start and valid, independent working rights in Japan, as visa sponsorship is not available.
