募集要項

Work closely with our Service Lead to deliver the managed service, bringing together the efficient delivery of service while driving innovations and value add for our customer. Work closely with the IT Operations , Laboratory Operations and Quality staff to support, enhance, and maintain laboratory device ecosystems and LIMS platforms. This role brings together hands-on instrument expertise, digital lab transformation, and strong data integrity practices to ensure reliable, compliant, and future-ready laboratory operations. You will contribute to standardization, integration, and automation initiatives across QC and R&D labs, helping the customer move toward a fully digital, connected laboratory environment.

スキル・資格

- Strong experience supporting laboratory instruments in a GxP laboratory environment.
- Hands on knowledge of analytical devices and their associated acquisition software.
- Strong experience with LIMS platforms (LabWare, SampleManager, LabVantage, etc.).
- Understanding of ELN, LES, CDS, and instrument to system data flows.

- Support audits (internal/external) by providing documentation, system evidence, and validation records.
 - Knowledge of IT/OT infrastructure relevant to laboratory systems (networks, servers, Windows OS, virtual machines).
 - Support audits (internal/external) by providing documentation, system evidence, and validation records.
 - Solid understanding of cybersecurity, backup/restore, and disaster recovery for lab systems.
 - Database creation and administration (SQL) for LIMS installation, setup, configuration and troubleshooting.
