募集要項

This role requires a meticulous QA professional with a passion for ensuring top-quality outcomes in the technology and telecoms sector. The successful candidate will be responsible for maintaining high standards in software testing and quality assurance in a fast-paced environment.

Client Details

This company is a well-established organization within the technology and telecoms industry, known for its innovative solutions and commitment to excellence. With a strong presence in the market, the company values technical expertise and precision.

Description

- Develop and execute detailed test plans to ensure software quality and performance.
- Identify, document, and track software defects and inconsistencies.
- Collaborate with cross-functional teams to resolve technical issues efficiently.
- Conduct manual and automated testing to validate software functionality.
- Analyze test results and provide detailed reports to stakeholders.
- Proactively suggest improvements to optimize testing processes.

- Stay updated on the latest trends and tools in quality assurance and software testing.

Job Offer

- Opportunity to work on cutting-edge technology projects
- Hybrid position
- Competitive Salary
- English main environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

スキル・資格

A successful QA should have:

- A strong background in quality assurance or software testing
 - Proficiency in manual and automated testing methodologies.
 - Experience with playwright.
 - Experience with AI
 - Automotive experience is welcomed
 - Effective communication and collaboration skills.
