募集要項

This role focuses on developing and supporting financial technology systems that process large-scale data, automate workflows, and improve reporting and risk management capabilities across global markets. The position involves full-stack development, collaborating with international teams and business stakeholders to design, implement, and deploy scalable solutions while leveraging modern technologies like cloud, AI, and data processing frameworks

Client Details

This opportunity is with a well-established organization in the financial services industry. The company is a large organization with a strong presence in Tokyo, known for its focus on leveraging technology to enhance operational efficiency and data accuracy.

Description

- Design, develop, and support scalable financial systems, including ETL pipelines, REST services, and front-end applications.

- Collaborate with global teams and business stakeholders to understand data workflows, define features, and deliver production-ready solutions.
- Optimize data processing, system performance, and deployments across large-scale datasets and platforms.
- Contribute to modernization initiatives by leveraging cloud, DevOps, and AI technologies while enhancing finance and reporting capabilities.

Job Offer

- Competitive salary
- Opportunity to work on cutting-edge technology projects in Tokyo.
- Hybrid opportunity
- Chance to gain valuable experience in the financial services industry.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

スキル・資格

- strong proficiency in Java, Scala, Python, and modern web frameworks
 - Solid experience with SQL and relational databases, and the ability to work with large-scale data processing environments
 - Strong analytical and problem-solving skills, with a proactive and self-motivated approach to ownership of tasks
 - Good communication skills, with the ability to clearly collaborate with global teams, stakeholders, and business users
 - Comfortable working in a full-stack environment with a willingness to learn new technologies, finance concepts, and adapt to evolving priorities
