募集要項

Company and Job Overview

Location: Hà Nội

A global technology company is looking for a Technical Lead Embedded Networking to drive embedded software development and architecture for advanced networking products.

Job Responsibilities

- Lead end-to-end development of embedded software for networking devices.
- Design system architecture and define solutions on Embedded Linux platforms.
- Develop and optimize networking features such as WiFi, PON, and Ethernet.
- Troubleshoot complex issues across software, networking protocols, and system integration layers.
- Conduct code reviews to ensure high code quality and maintainability.

- Mentor engineers and support technical development within the team.
- Collaborate with cross-functional and international teams on project execution and risk management.
- Take ownership of feature delivery from design to release.

Job Requirements

- Degree in Computer Science, Electrical Engineering, or related field.
- 5+ years of experience in embedded software or networking development.
- Proven experience in technical leadership or mentoring engineers.
- Strong understanding of networking protocols
- Hands-on experience with Embedded Linux
- Good English communication
- Experience with broadband technologies (WiFi 6/7, PON, ...).
- Familiarity with chipsets such as Qualcomm, Broadcom.
- Experience working in international teams.
- Knowledge of Agile/Scrum methodologies.

Benefit

- Competitive salary with performance based bonuses and annual reviews.
- Additional yearly bonus in line with company performance.
- Comprehensive health insurance package.
- Flexible working hours with a strong focus on work-life balance.
- Opportunity to work on cutting-edge networking technologies.
- Collaborative and growth-oriented engineering environment.

Due to the volume of applications, only shortlisted candidates will be contacted. Thank you for your interest.
