募集要項

Company Overview

The company is a worldwide leader in wireless broadband solutions

Job Responsibilities

- Define and execute test strategies, test plans, and validation frameworks for networking products.
- Perform various testing activities including functional, performance, stability, and regression testing.
- Analyze network issues using diagnostic tools such as Wireshark and Tcpdump to identify root causes.

- Work closely with development teams to reproduce issues and ensure product quality.
- Build and enhance QA processes, testing standards, and validation methodologies.
- Drive the adoption of automation testing and improve overall test efficiency.
- Mentor QA engineers and contribute to team capability development.
- Ensure release readiness and continuously improve product quality and test coverage.

Job Requirements

- 3+ years of experience in networking, broadband, telecom, or related QA/validation roles.
- Strong knowledge of networking fundamentals such as TCP/IP, routing, switching, and troubleshooting.
- Hands-on experience with packet analysis and diagnostic tools (e.g. Wireshark, Tcpdump).
- Strong analytical thinking, problem-solving, and root cause analysis skills.
- Experience leading testing activities or mentoring team members.
- Ability to work independently and collaborate across cross-functional teams.
- Good English communication skills.
- Bachelor's degree in Computer Science, IT, Telecommunications, or related field.
- Experience with issue tracking tools
- Hands-on experience with automation testing (Python, Robot Framework, Shell)
- Familiarity with broadband protocols such as TR-069, TR-369.
- Testing certifications such as ISTQB.

Benefit

- Competitive salary package with performance-based bonuses and annual reviews.
- Additional yearly bonus aligned with company performance.
- Comprehensive health insurance coverage.
- Flexible working environment with strong work-life balance.
- Opportunity to work on advanced networking and telecom technologies.
- Collaborative and growth-focused engineering culture.

Due to the volume of applications, only shortlisted candidates will be contacted. Thank you for your interest.
