募集要項

COMPANY OVERVIEW

Our client stands as Japan's premier and renowned company, offering top-tier cloud services (SaaS) that empower businesses to optimize their operations with exceptional speed and convenience.

JOB RESPONSIBILITIES

- Collaborate with the Project Manager (PM) and project development team members to analyze the technical specifications of the product, changes in technical specifications, and additional new features.
- Participate in project development as a Technical Specialist from the Outline Design, Detail Design, Development/Implementation, Code review, Unit test, to Release stages.
- Design Databases, develop functionalities, and provide support to team members concurrently.

- Perform other tasks as assigned by the Project Manager (PM).

JOB REQUIREMENTS

- At least 4 years of experience working with Java in Web Application development projects.
- Experience working with the Spring or Spring Boot framework.
- Experience working with JUnit.
- Experience or knowledge of DDD is an advantage.
- Experience working with PostgreSQL/MySQL.
- Ability to research and solve technical issues.
- Good English reading comprehension skills.

Nice to have:

- Have experience as a Team Leader/Senior in projects with a minimum of 2 developers.
- Experience in providing technical support and guidance to team members.
- Experience in code review.
- Experience in interviewing and assessing the technical skills of potential candidates.
- Ability to read, understand, and analyze business requirements from clients.
- Ability to identify and resolve issues effectively.
- Ability to thrive under high pressure.
- Ability to create/present technical documents in an understandable manner.
- Good communication skills.
- Ability to train team members.
- Understanding of Japanese company's work processes and styles is an advantage.
