### 募集要項

Our client is a well-established engineering services provider in the power & energy sector, supporting major power plant operations across the region. The company works closely with global OEM partners and is involved in outage, maintenance, and upgrade projects for large scale power generation facilities.

Due to business expansion, they are looking for experienced engineers to join their new business Power Division)

#### Job Responsibilities:

- Develop technical and commercial proposals for power plant projects
- Identify opportunities in retrofit, upgrade and life extension solutions
- Engage with customers to understand technical requirements and business needs
- Prepare cost estimate, tenders and bid documentation
- Coordinate with internal teams (engineering, supply chain, global stakeholders)
- Present solutions and support project discussion with clients
- Align technical scope with commercial teams, contracts and risk assessment

#### Requirements:

- Bachelor Degree in Engineering (Mechanical/ Electrical or related)
- Minimum 10 - 15 years of experience in power plant, steam turbine engineering

- Strong knowledge of thermal power plant system
- Strong exposure in retrofit / upgrade / aftermarket solutions preferred
- Experience in proposal, tender or costing is highly preferred
- Good understanding of commercial terms, pricing and risk management
- Strong communication and presentation skills
- Fluent in English and Bahasa Malaysia (Written & Spoken)
- Willing to travel regularly
