募集要項

DUTIES AND RESPONSIBILITIES >

Project & Digital Execution

- Assist in planning and executing IT and e-commerce projects, ensuring timely delivery and alignment with business objectives
- Translate business requirements into technical specifications and work with vendors to deliver effective solutions
- Manage project documentation, timelines, RAID logs, and stakeholder communication using PM tools (e.g., Jira, Confluence)
- Plan, coordinate, and support User Acceptance Testing (UAT) activities to ensure solution quality and secure business sign-off
- Support ERP and e-commerce integration initiatives, including APIs, EDI, and data workflow design

- Participate in global system rollouts/roll-ins and coordinate with all stakeholders
- Identify good use cases for Digital Transformation (DX) adoption and assist in identifying new technologies relevant for business growth.

Data Analytics & Insights

- Provide data analysis and reporting to support business decisions
- Collaborate with vendors or internal teams on introducing analytics platforms (like Power BI, Looker) and SQL-based data queries
- Define and drive dashboard adoption; promote a data-driven culture across business teams

Automation & AI Exploration

- Explore and pilot agentic AI tools for workflow automation, data processing, and efficiency improvements (e.g., prompt-driven process orchestration, RPA hand-offs)
- Identify opportunities for AI-driven enhancements in IT and business processes; propose experiments with clear success criteria

Vendor Management

- Collaborate with vendors to ensure cost-effective solutions and challenge proposals constructively
- Review and challenge cost breakdowns, licensing, and solution architecture; ensure delivery quality against SLAs and acceptance criteria
- Lead delivery governance cadences (status, demos, risk/issue tracking) and uphold documentation standards

E Commerce & Retail IT

- Support Magento/Adobe Commerce projects and integrations with ERP, OMS, WMS, and POS systems
- Understand retail operations and store setup processes to anticipate future data analytics needs
- Lead or support RFID implementation projects for inventory tracking and retail process automation

< REQUIRED SKILLS & EXPERIENCE >

- A minimum of 5 years of practical IT project management, systems integration, or e-commerce technology, ideally within the retail or luxury sector
- A minimum of 3 years in-house IT experience. Apparel Fashion industry is plus.
- Bachelor's degree in IT, Computer Science, or related field
- Proven ability to manage multiple projects and tasks in a fast-paced, agile environment
- Familiarity with APIs, EDI, and system integration concepts
- Exposure to ERP systems (SAP S/4HANA, Oracle NetSuite) and e-commerce platforms (Magento/Adobe Commerce)
- Strong analytical skills; ability to work with data and vendors effectively
- Ability to work independently while demonstrating a strong sense of initiative and accountability
