募集要項

COMPANY OVERVIEW

We are a globally established technology organisation specialising in the design and manufacturing of advanced power supply solutions, serving industries such as industrial automation, healthcare, telecommunications, and energy. With a strong international presence, we are committed to delivering high-performance, reliable products through continuous innovation and engineering excellence. Our Singapore operations play a key role in research and development, offering engineers the opportunity to work on end-to-end product development—from design and simulation to testing and production—within a collaborative environment that supports learning, technical growth, and career progression.

JOB RESPONSIBILITIES

Join a global leader in power supply solutions and be part of an innovative R&D team developing next-generation power electronics products.

This is a hands-on engineering role where you will design, test, and improve real products used worldwide

- Design and develop switch-mode power supplies (SMPS)
- Work on analog & digital control systems
- Build prototypes and perform lab testing (oscilloscope, etc.)
- Run simulations (LTSpice, MATLAB, etc.)
- Troubleshoot and optimise designs for performance and reliability
- Collaborate with manufacturing, PCB, and quality teams

JOB REQUIREMENTS

- Degree in Electrical / Electronic Engineering
- Fresh graduates welcome (internships/projects are a plus)
- Strong foundation in Circuit design / electronics and Power electronics (basic understanding is enough)
- Hands-on mindset (lab, testing, debugging)
- Curious, self-driven, and eager to learn
- Good communication & teamwork skills

NICE TO HAVE (BONUS SKILLS)

- Embedded programming (C/C++ / MCU)
- Simulation tools (LTSpice / MATLAB / Simulink)
- PCB design or hardware projects
- Python / automation tools

Working Location: Singapore
