募集要項

Our client, a **leading Japanese textile manufacturing company**, is seeking an Automation & Maintenance Engineer to maintain and optimize electrical and automation systems in their production facility.

Key Responsibilities

- Troubleshoot and resolve electrical and automation equipment issues
- Program and modify PLC systems (**Omron, Mitsubishi, Siemens**)
- Maintain and calibrate inverters, motors, and sensors
- Design and develop electrical control panels and circuit diagrams
- Coordinate with external vendors and contractors for technical support

Requirements

- Minimum **SMK/D3/S1** in **Electrical Engineering** or related field
- 2 years of experience** in electrical/automation maintenance

Hands-on experience or knowledge in PLC programming (CX-Programmer, GX Works, SIMATIC)
Strong knowledge of inverter and motor control systems
Able to read and create electrical circuit diagrams
Good troubleshooting and analytical skills

Preferred Skills

Experience in textile manufacturing environment is a plus!
Field equipment commissioning experience
Knowledge of high-voltage electrical systems
