募集要項

Join a senior-level role leading the design and enhancement of logistics systems that power both trunk-route and last-mile delivery operations. You will focus on frontend development while collaborating with cross-functional teams to deliver scalable and high-performance applications.

Client Details

A leading global e-commerce and digital services organization with a large-scale logistics platform supporting nationwide operations. The company operates complex, high-volume systems and fosters a collaborative, engineering-driven culture.

Description

- Lead frontend development for trunk-route management web applications
- Develop frontend features for logistics mobile applications
- Collaborate closely with backend engineers to deliver integrated solutions
- Optimize system performance and enhance UI/UX
- Conduct code reviews and ensure quality through testing
- Create and maintain technical documentation for development activities

Job Offer

- Opportunity to lead development in large-scale logistics systems
- Exposure to complex, high-traffic platforms with real-world impact
- Collaborative international team environment
- Office-based role in Tokyo with standard hours (9:00-17:30, weekdays)

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

スキル・資格

- 5+ years of experience in application development using Java
 - Proven experience with React for frontend development
 - Strong ability to read, analyze, and improve existing codebases
 - Self-driven, proactive mindset with the ability to work independently
 - Business-level English proficiency (e.g., TOEIC 800+)
 - Japanese not required
-

会社説明
