募集要項

Role Overview:

We are looking for a highly motivated Research Chemist to contribute to the synthesis and development of novel agrochemical molecules. This role involves hands-on laboratory work, analytical characterization, and close collaboration with cross-functional teams to drive chemistry research projects forward.

Key Responsibilities:

- Synthesize novel agrochemical compounds using standard organic chemistry techniques
- Perform purification of compounds through chromatography, column purification, and extraction methods
- Carry out analytical characterization using techniques such as NMR and mass spectrometry
- Maintain accurate and well-documented experimental records

- Collaborate effectively with team members to support and advance ongoing research projects

Required Skills & Qualifications:

- Strong foundation in organic chemistry principles
- Good knowledge of named reactions and functional group transformations
- Clear understanding of molarity, normality, and equivalence concepts
- Hands-on experience in chromatography, column purification, and extraction techniques
- Basic working knowledge of analytical tools such as NMR and mass spectrometry
- Proficiency in English with business-level communication skills
