募集要項

About the Company: Our client is a well-established **manufacturing company in the frozen seafood industry**, specializing in processed shrimp products. The company is export-oriented, with key markets in Japan and the United States.

Job Responsibilities:

- Lead and manage the engineering team (supervisors and operators across 3 shifts, ±30–35 personnel).
- Oversee maintenance, repair, and optimization of production machinery and utilities.
- Ensure smooth operation of all engineering systems to support production targets.
- Develop and implement preventive and corrective maintenance programs.
- Drive continuous improvement initiatives related to efficiency, cost reduction, and equipment reliability.
- Collaborate closely with Production, QA, and PPIC teams to ensure operational excellence.

- Manage CAPEX projects (machine investment, upgrades) and OPEX control.
- Ensure compliance with safety standards and regulations.
- Prepare reports and present updates to management.

Requirements:

- Bachelor's degree in Engineering (Mechanical, Electrical, or related field).
- Minimum 5–7 years of experience in engineering within manufacturing companies.
- Experience in **food processing industry or at least in manufacturing industry** is highly preferred.
- Strong technical knowledge of machinery, utilities, and maintenance systems.
- Proven leadership experience managing teams and shift operations.
- Good communication and problem-solving skills.
- Able to work in a fast-paced manufacturing environment.
- English proficiency is preferred
