募集要項

Job Title: New Business Development (Raw Material/Plastic)**Location:** Rama9 (MRT accessible)**Job Type:** Full-time, Monday – Friday from 08:30 to 17:30**Industry:** Manufacturing

Job Purpose:

- Support the development and execution of new business development (NBD) strategies for assigned product areas in the Functional Materials Division (FMD), in alignment with divisional direction and corporate strategy.
- Execute full-cycle sales activities — customer prospecting, proposal, negotiation support, and commercialization — with a primary focus on the Thai automotive / mobility sector (Tier-1 suppliers and OEMs).

- Provide market research, competitive intelligence, and business proposals to support management decision-making and mid- to long-term portfolio development.

Job Responsibility:

[New Business Development]

- Conduct market research, customer needs analysis, and competitive benchmarking to identify new business opportunities in targeted industries (primarily Mobility / Automotive) in Thailand and ASEAN.
- Evaluate new product concepts, applications, and business models in collaboration with Head Quarter and other branches; prepare feasibility summaries and business proposals for review by the Manager.
- Analyze market trends, emerging technologies (including EV and lightweight materials), and competitor activities to generate actionable market intelligence for the division.
- Execute new business development activities: customer prospecting, initial approach, technical proposal preparation, negotiation support, and project commercialization.
- Develop new customer accounts and strategic partnerships, with particular focus on Tier-1 automotive parts manufacturers and OEMs in Thailand.
- Manage the assigned New Business Development (NBD) project pipeline: track milestones, identify bottlenecks, and report project status regularly to the Manager; achieve assigned NBD sales and commercialization KPIs.

[Business Execution & Project Management]

- Execute business plans and assigned tasks in line with Manager / Senior Manager direction; manage individual project timelines, milestones, and deliverables.
- Monitor personal business performance against KPIs; identify gaps, analyze root causes, and propose corrective actions proactively; manage assigned selling expenses within approved limits.
- Prepare monthly business reports and maintain accurate records of sales activities, customer information, project pipeline, and competitive intelligence.

[Global & Internal Collaboration]

- Coordinate with Head Quarter and other branches to align business activities with global and regional strategies; submit required business reports and market data on schedule.
- Collaborate with internal teams (Technical, SCM, Production, QA, Finance) to deliver integrated customer solutions and ensure seamless order fulfilment.
- Serve as the primary liaison between customers and internal stakeholders on product specifications, quality issues, and delivery matters.

Qualification:

[MUST]

- Bachelor's degree in Chemistry, Chemical Engineering, Materials Science, or a related field.
- Minimum 5–8 years of experience in business development, sales, or technical sales roles within the specialty chemical, polymer, or automotive materials industry.
- Demonstrated ability to execute sales activities across the full cycle from prospecting through to closing; experience developing new customer accounts and managing a personal sales pipeline is required (not limited to business development or introductory roles only).
- Experience in preparing business proposals, feasibility summaries, and market intelligence reports for management review.
- Proficiency in English (written and spoken minimum upper-intermediate level) for customer communication, Head Quarter, and other branches coordination/report preparation.
- Ability to travel within Thailand and to ASEAN markets (e.g., Vietnam, Indonesia) for customer visits and business development activities.
- Knowledge or experience in Thailand's automotive / mobility industry (Tier-1 suppliers, OEMs)

- Own a car with a valid driving's license.

[Preferred]

- Hands-on experience in EV / lightweight material trends.
- Familiarity in ASEAN cross-border business development or working in a Japanese multinational company environment.
- Ability to communicate in Japanese will be highly advantage.

Benefit:

- Annual leaves and holidays
- Provident Fund
- Health Insurance
- Medical Benefits
- Car Allowance (client onsite visitation)
- Gasoline Allowance
- Annual bonus (average of 3-4 months)
- Other benefits are followed by company's policy
