募集要項

Join a global algorithmic trading team to develop and enhance Java-based execution platforms used by front-office trading teams. You'll work across the full development lifecycle, collaborate closely with Quants, and support high-performance, real-time trading applications in a global environment.

Client Details

Our client is a leading global financial institution known for its investment in technology-driven trading and capital markets solutions. They offer the opportunity to work on business-critical platforms in a fast-paced, collaborative environment supporting global market operations.

Description

- Develop and enhance Java-based algorithmic trading applications for a global execution platform.
- Participate in the full software development lifecycle, including design, development, testing, and deployment.
- Collaborate closely with Quantitative Analysts and front-office trading teams to deliver new functionality and trading strategies.
- Provide L2/L3 application support and troubleshoot issues within high-performance, real-time trading systems.

Job Offer

- Competitive salary

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

スキル・資格

- Proven experience developing applications in Java, ideally within a low-latency or high-performance environment.
- Strong understanding of the software development lifecycle, including design, development, testing, and support.
- Ability to collaborate effectively with technical and business stakeholders, including Quants and front-office users.
- Strong analytical and problem-solving skills, with the ability to troubleshoot and support business-critical applications.

会社説明

Our client is a leading global financial institution known for its investment in technology-driven trading and capital markets solutions. They offer the opportunity to work on business-critical platforms in a fast-paced, collaborative environment supporting global market operations.
