募集要項

A fast-growing technology company is seeking an **Accounting Domain Expert** to support the transformation of enterprise accounting operations through AI-powered solutions.

This role is ideal for an experienced accounting professional who wants to apply their practical finance knowledge in a more strategic and consultative capacity. You will work closely with enterprise customers to understand their accounting processes, identify operational challenges, and design improved workflows through innovative technology solutions.

Acting as the bridge between accounting expertise and technology, you will collaborate with

project managers, product teams, AI specialists, and developers to support successful implementations and help shape the future of digital accounting.

This is an opportunity to leverage your accounting background while developing expertise in AI, SaaS, and finance transformation.

Accounting Process Consulting

• Understand customer accounting operations, workflows, and business challenges.

• Analyze current processes and identify opportunities for automation and improvement.

• Propose optimized accounting processes using AI-powered solutions.

• Provide accounting expertise throughout customer implementation projects.

Client Engagement & Requirements Support

• Participate in customer meetings and business requirement discussions.

• Translate accounting needs into practical system and operational solutions.

• Collaborate with project managers and technical teams to support successful project delivery.

• Build strong relationships with customers as a trusted accounting advisor.

Product & Solution Improvement

• Provide feedback to AI and development teams based on customer requirements and accounting practices.

• Support continuous improvement of products and services.

• Contribute accounting expertise to the development of next-generation finance solutions.

スキル・資格

Required Qualifications

• **5+ years of practical accounting experience within an enterprise company.**

• Strong understanding of financial accounting operations, including:

o Accounts Payable (AP)

o Accounts Receivable (AR)

o Fixed asset management

o Purchasing processes

o Expense reimbursement

o General accounting processes

• Experience identifying issues, improving workflows, or optimizing accounting

processes.

• Strong communication skills with the ability to collaborate with customers and cross-functional teams.

Preferred Qualifications

• Experience with ERP, accounting system implementation, or finance transformation projects.

• Experience in business process improvement or operational consulting.

• Experience working with external clients or supporting business solutions.

• Interest in AI, automation, SaaS, and digital transformation.

• Nissho Bookkeeping Level 2 or equivalent accounting knowledge.
