募集要項

COMPANY OVERVIEW
Our Client Company is a well-established manufacturer specializing in electrical and electronics components manufacturing, the organization is hiring for Operation Manager to oversee end-to-end factory operations within a dynamic production environment. The role will be in charge of driving operational excellence, leading cross-functional teams, optimizing manufacturing performance, implementing improvement initiatives as well as contributing to business growth.

JOB RESPONSIBILITIES

- Develop and execute operational strategies to achieve production, quality, delivery, and cost targets while aligning manufacturing activities with business objectives.
- Lead daily factory operations, including production, planning, engineering, quality, maintenance, procurement, inventory management, and logistics to ensure efficient and reliable execution.
- Drive capacity planning, factory layout optimization, capital investment initiatives, and New Product Introduction (NPI)

collaboration across departments.

- Monitor operational performance through KPIs such as output, yield, efficiency, and downtime, implementing corrective actions and data-driven improvements where required.
- Champion Lean Manufacturing, 5S, automation, digitalization, and continuous improvement initiatives to increase productivity, reduce waste, and enhance operational effectiveness.
- Ensure compliance with ISO, UL, and other applicable standards while maintaining high levels of product quality, reliability, and customer satisfaction.
- Build and develop high-performing teams by coaching managers, fostering accountability and safety, and identifying future leaders within the organization.

JOB REQUIREMENTS

- Bachelor's Degree in Engineering, Manufacturing, Operations Management, or a related discipline.
- Preferably with at least 10 years of experience in managing manufacturing operations, experience in electrical / electronic components would be added advantage.
- Capability in leading cross-functional teams and overseeing large-scale production operations.
- Strong leadership and people management skills.
- Proven ability to drive operational improvements, cost optimization, and organizational development initiatives.
- Well versed in Lean Manufacturing methodologies and implementation.

Interested candidates are welcomed to apply online.
