募集要項

JOB RESPONSIBILITIES

- Provide technical expertise in Silicon Photonics and High-Speed Interfaces, with a focus on MP1900A Signal Quality Analyzer and Vector Network Analyzer, to help customers achieve compliance and accelerate product development.
- Lead customer evaluations, deliver on-site demonstrations, and drive troubleshooting to resolve complex signal integrity issues.
- Analyze measurement results (Eye Diagram, Jitter, SNDR, BER, etc.), identify root causes, and deliver actionable technical reports.
- Provide technical seminars, demonstrations, and application notes to customers and partners.
- Report on the status, progress and issues about the projects/tasks to ACVN BDM and the ACVN management periodically in a timely manner and proper way.

JOB REQUIREMENTS

- Bachelor's degree or higher in Electrical Engineering, Computer Engineering. Degrees in mathematics, physics or other science degree may be considered
- Familiarity with High-speed Interface standards such as PCI-Express(PCIe Gen3~Gen6), USB (3.2 / USB4 / USB4 v2), Ethernet (400GbE / 800GbE PAM4) , OIF (OIF-56G)
- Hands-on experience in debugging and compliance testing of high-speed interface standards (e.g., PCIe, USB, Ethernet).
- Communication fundamentals, Signal Integrity and measurement techniques: insertion loss, cross talk, jitter, skeep, eye diagram, and BER.
- Hands on expertise with oscilloscope, VNAs, BERT.
- Excellent communication skills in English (verbal and written)
- Proactive, self-motivated, and self-directed to work independently.
- Strong team player with ability to work independently
