募集要項

My client, One of the biggest services company is looking for Senior Software Engineer. The ideal candidate will have extensive knowledge in application development, Architecture, and solutions driven mindset.

Responsibility:

- Develop applications using Java, Spring framework.
- Collaborate with the Technical Lead to understand project requirements and deliver effective digital solutions.
- Analyze, design, and implement application features to meet the needs of the business.
- Drive code quality, operational excellence, system observability, and continuous improvement initiatives.
- Contribute to architectural decisions and technology roadmaps.
- Explore and support the development of AI-powered products and solutions
- Collaborate with a global team to meet project targets and quality standards.

Requires skills:

- Proven experience as an Application Developer, specifically in Java, Spring Framework, and other application development tools (5-7 years).
- Tech Lead experience
- Excellent knowledge in Micro service architecture concepts and containerized applications
- Excellent knowledge in Cloud Architecture & Designing (mainly GCP or AWS)
- Strong expertise in building highly scalable microservices architectures.

- Excellent knowledge of API design and implementation.
- Experience with Typescript, React or similar front-end tools.

If you see yourself in this role, please apply or reach out to me directly at +81 50-1807-7361
