募集要項

Join a product-focused team responsible for creating intuitive and impactful digital experiences for users in Japan. This role offers end-to-end ownership of UX/UI design, from problem definition and user flows through to high-fidelity designs and final specifications.

Client Details

Our client is a well-established technology driven organization developing web-based digital products for a broad user base. They are a cutting edge mobility company, developing products and platforms across AI, software, connected vehicles, and autonomous mobility.

Description

- Lead UX and UI design initiatives for product features from discovery through delivery
- Translate ambiguous business challenges into clear user goals, flows, and interaction models
- Contribute to design briefs by defining context, opportunities, objectives, and scope
- Partner closely with Product Managers and Engineers throughout the product development lifecycle
- Create designs within a shared design system to maintain consistency across the product
- Collaborate with UX Writers and Researchers to incorporate user insights into design decisions

- Produce high-fidelity UI designs, prototypes, and detailed design specifications
- Advocate for user-centric design principles and best practices

Job Offer

- Hybrid work environment in Tokyo (3 days onsite)
- Opportunity to influence product strategy and user experience
- Cross-functional collaboration with experienced Product and Engineering teams
- Exposure to complex product challenges and large-scale digital experiences
- Professional growth within a design-driven environment
- Very competative salary

スキル・資格

- Understanding of Japanese users and customer expectations
- Experience in UX/UI product design for web-based products
- Demonstrated end-to-end design capabilities, from problem definition through final UI delivery
- Strong experience collaborating with Product Management and Engineering teams
- Ability to communicate effectively in Business English
- Experience working within established design systems is highly valued
- Strong portfolio showcasing product design work and user centered thinking

会社説明

A leading global technology company developing digital products and services used by millions of customers worldwide. The organization is known for its strong product culture, collaborative environment, and commitment to creating intuitive user experiences through close partnership between Design, Product, Engineering, and Research teams.

With a focus on innovation and customer-centric design, the company offers the opportunity to work on impactful web-based products while contributing to the evolution of scalable design systems and user experiences for the Japanese market.
