募集要項

Location: Close to Silom station.

Overview: The international client is providing financial services, operating business for over 10 years.

You will experience an international work environment where you speak English at work.

Description

- Develop software in financial, leveraging advanced technology: AI and Data Analytics to solve operation challenges
- Design and build robust APIs, managing the backend stacks and strategically integrating LLM capabilities into company's product features with RESTful APIs using Django
- Implement LLM APIs to create features powered by advanced prompting, function calling, and RAG architectures
- Write clean, maintainable code and applying AI technology to drive faster, high-quality delivery
- Design resilient backend architectures and robust data models to support system growth
- Design database schemas, normalized database models built for high performance and future flexibility
- Work closely with frontend, UXUI, product team to deliver features till launch (end-to-end)
- Perform code review, technical architecture design, and agile sprint planning
- Provide advice and guidance to junior as required
- Manage DevOps operations; infrastructure management, and deployment pipelines across projects

Qualification

- Bachelor's degree in Computer Engineering, Computer Science, Information Technology, related
- 5+ years of work experiences in software development with Python Django and Django REST framework (or similar REST tooling)
- Experienced in utilizing modern AI coding tools (e.g.,Cursor, Claude Code, Copilot)
- Experienced with Git, CI/CD pipelines, and deploying and managing applications in production (e.g.,major cloud ecosystems like AWS, Azure, Google Cloud, Heroku)
- Good English speaking is a must. Internal communicates via English.

Interested applicants, please click APPLY NOW. Due to the high number of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
