募集要項

company Overview:

A leading Japanese automotive display solutions company specializing in instrument clusters, TFT displays, and advanced driver information systems, with manufacturing and engineering operations in India and ongoing expansion driven by growth and localization initiatives.

Job Responsibilities:

- Perform preventive maintenance as per schedule on injection moulding machines (e.g., Sumitomo, Nissei, Fanuc Matsui etc.)
- Diagnose and troubleshoot mechanical, electrical, and hydraulic faults in moulding machines.
- Handle breakdown maintenance quickly to reduce machine downtime.
- Maintain and service auxiliary equipment like Mold temperature controllers, chillers, dryers, and robots.

- Ensure machine alignment, platen parallelism, and clamping force settings are within standard.
- Calibrate and inspect servo motors, heaters, sensors, and hydraulic valves.
- Maintain maintenance checklists, logbooks, and downtime records.
- Participate in continuous improvement (Kaizen, TPM, 5S) and energy-saving activities.
- Assist in installation and commissioning of new moulding machines.

Job Requirement:

- Qualification: Diploma
- Experience: 4 - 8 Year
