募集要項

Company Overview

A company in the telecommunications and IT infrastructure industry is hiring for a System Engineer position.

Location: Phu My 3 Specialized Industrial Park.

Job Description

- Understand customer requirements and propose appropriate IT infrastructure solutions.
- Manage IT infrastructure projects from solution planning through implementation.
- Select suitable IT equipment based on proposed solutions, then install and configure equipment onsite.

- Provide regular maintenance, troubleshooting, and onsite technical support to ensure stable IT infrastructure operations.
- Respond to customer inquiries and resolve technical issues onsite.
- Operate and manage the server room, including asset management and related operations.

Qualifications

- Basic knowledge of IT infrastructure, including PCs, systems, networks, and servers.
- At least one year of experience in customer-facing roles.
- Hands-on experience configuring PCs, servers, routers, switches, firewalls, and Wi-Fi access points.
- Familiarity with Microsoft 365, Google Workspace, or similar cloud services.
- Good English communication skills.
- Team-oriented and flexible mindset.
- Ability to comply with company security policies, internal rules, and operational standards.
- Understanding of Japanese business manners is preferred.
