募集要項

COMPANY OVERVIEW
Our Client Company is a well-established manufacturer specializing in electrical and electronics components manufacturing, the organization is hiring for **NPI Engineer** to coordinate in new products from development into production. The role involves collaborating across departments and contributing to process improvements that support successful product launches and manufacturing excellence.

JOB RESPONSIBILITIES

- Support the transfer and implementation of new products from the development stage into mass production while meeting planned timelines.
- Analyze customer drawings and Bill of Materials (BOM) to ensure manufacturability and efficient production processes.
- Prepare and maintain engineering documentation, including work instructions, modification records, and technical

manuals.

- Coordinate with cross-functional teams to ensure smooth New Product Introduction (NPI) activities and successful project execution.
- Conduct product verification through testing, inspections, and data analysis to evaluate performance and quality.
- Prepare engineering reports and provide insights based on product performance trends and findings.

JOB REQUIREMENTS

- Possesses Bachelor's Degree / Diploma in Electrical, Electronic Engineering or equivalent.
- Preferably with 1-2 years of experience as NPI Engineer in manufacturing industry; fresh graduates with relevant internship experience are welcome to apply.
- Exposure in PCBA / Electronics industry would be added advantage.
- Strong analytical and problem-solving skills.
- Good communication abilities to coordinate with various relevant departments.

Interested candidates are welcomed to apply online.
