募集要項

Company Overview
Our client is a highly esteemed and well-established engineering contractor, recognized globally for its comprehensive Mechanical & Electrical infrastructure expertise. With a significant and successful presence in Singapore, they are a leader in delivering complex, large-scale projects, including cutting-edge data centers, commercial high-rises, and industrial facilities. Their commitment to superior quality, precision engineering, and rigorous safety standards sets them apart. As they continue to expand their impressive portfolio of critical infrastructure projects, they are seeking an experienced and dynamic Electrical Engineer / Electrical Project Manager to lead key initiatives and drive successful project outcomes.

Key Responsibilities

- Oversee, manage, and execute electrical engineering projects from the initial planning stages through to testing, commissioning, and final handover.
- Review and prepare electrical design calculations, technical specifications, and working drawings to ensure full compliance with project requirements and statutory codes.

- Coordinate effectively with clients, consultants, main contractors, and internal project teams to ensure the seamless integration of electrical systems with other engineering disciplines.
- Supervise site installations, monitor daily work progress, and ensure that all electrical works are executed safely, on schedule, and to the highest quality standards.
- Manage material procurement, review vendor and subcontractor submissions, and resolve any technical or site-specific issues promptly.
- Conduct regular site inspections, lead or attend project meetings, and prepare accurate site progress reports.
- For the Managerial role: Lead and mentor a team of engineers and supervisors, optimizing resource allocation and driving overall project performance.

Key Requirements

- Degree or Diploma in Electrical Engineering or a related discipline.
- Minimum of 3 to 5 years of relevant experience in electrical building services or M&E projects for the Engineer role; 8+ years of experience with a proven track record in project leadership for the Manager role.
- Strong familiarity with local electrical codes, statutory regulations, and industry safety standards.
- Proficiency in relevant engineering and drafting software (e.g., AutoCAD; experience with BIM/Revit is highly advantageous).
- Excellent problem-solving skills with a proactive, hands-on approach to managing site challenges.
- Strong communication and interpersonal skills, with the ability to collaborate effectively in a fast-paced and dynamic environment.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
