募集要項

Company Overview

We are seeking a highly motivated Japanese Speaking Technical Translator to support communication and technical coordination between Japanese and local teams within a manufacturing environment. The successful candidate will play a key role in translating technical documents, interpreting during meetings, and facilitating effective communication for engineering-related projects. Working location is in Pasir Gudang, Johor

Key Responsibilities

- Translate technical, engineering, production, quality, and operational documents between Japanese and English.

- Provide interpretation support during meetings, discussions, training sessions, audits, and business visits.
- Act as a communication bridge between Japanese expatriates and local employees.
- Support engineering teams in preparing reports, presentations, technical specifications, and project documentation.
- Assist in coordinating engineering projects and ensuring accurate communication of technical requirements.
- Translate emails, manuals, work instructions, standard operating procedures (SOPs), and other business documents.
- Maintain confidentiality and accuracy when handling technical information.
- Perform other duties assigned by management from time to time.

Job Requirements

- Bachelor's Degree in Engineering (Mechanical, Chemical, Electrical, Industrial, Materials, Manufacturing, or related disciplines)
- 1 to 3 years of working experience preferably in manufacturing industry.
- Japanese language proficiency of JLPT N2 or above.
- Able to understand and translate technical and engineering terminology.
- Strong interpersonal skills and ability to work effectively in a multicultural environment.
- Proficient in Microsoft Office applications.
- Fresh graduates with strong Japanese language skills and relevant internship exposure may be considered.
