募集要項

A global technology leader developing advanced process equipment and solutions — enabling innovation across the semiconductor, compound semiconductor, data storage, and advanced scientific research industries — is hiring a Quality Engineer. This is a dual-function quality engineering role covering Supplier Quality (SQE) and Product Quality (PQE), serving as a key liaison between suppliers, manufacturing, and engineering teams. The role reports to the Supplier Quality Manager.

Key Responsibilities:

- Supplier Quality Engineering (SQE)
  - Lead supplier audits, CAPA closure, and corrective action programs
  - Drive supplier qualification, performance monitoring (KPIs, scorecards), and continuous improvement
  - Develop PFD, PFMEA, Control Plans, MSA, and SPC with suppliers
  - Support NPI readiness, product transfers, and change management

    - Manage incoming quality controls and containment strategies
- Product Quality Engineering (PQE)
    - Lead cross-functional root cause investigations (8D, RCCA, 5-Why, Fishbone, FMEA, CAPA)
    - Analyze manufacturing, warranty, and field reliability data
    - Maintain quality KPIs, dashboards, and management reports
    - Drive improvements to SOPs, work instructions, and control plans
- Quality Systems & Continuous Improvement
    - Support internal, supplier, and customer audits
    - Participate in NPI, engineering change, and manufacturing transfer activities
    - Champion a culture of quality and continuous improvement

Key Requirements

- Bachelor's degree in Mechanical, Electrical, Industrial, Manufacturing, or Quality Engineering.
- Minimum 5 years of experience in SQE, PQE, Manufacturing Quality, or related quality discipline.
- Experience in semiconductor equipment, capital equipment, precision manufacturing, electronics, or complex electromechanical products preferred.
- Proven experience working with global suppliers and contract manufacturers.
- Experience supporting NPI, product transfers, supplier qualification, and quality improvement programs.
- Proficiency in 8D, CAPA, RCCA, FMEA, 5-Why, Fishbone Analysis.
- Experience with SPC, MSA, Control Plans, and process capability studies.
- Working knowledge of GD&T, inspection methods, metrology, and manufacturing processes.
- ERP systems (SAP preferred); Minitab, Power BI, or equivalent.
- ASQ certifications (CQE, CSQP, CMQ/OE, CQA) and/or Six Sigma GB/BB preferred.
- Willingness to travel domestically and internationally up to 30%.
