募集要項

JOB RESPONSIBILITIES

- Lead quality assurance activities for surface treatment, precision cleaning, contamination control, and manufacturing quality processes.
- Ensure compliance with quality management systems, customer requirements, and applicable industry standards, while maintaining quality documentation and control plans.
- Manage internal and customer audits, conduct gap assessments, and drive corrective and preventive actions to achieve audit readiness and compliance objectives.
- Establish and monitor quality standards for surface treatment processes, including coating inspections, process capability analysis, and statistical process control.
- Develop and maintain contamination control programs and verify cleanliness requirements through various testing and inspection methods.

- Collaborate with suppliers and cross-functional teams to improve quality performance, resolve issues, and enhance manufacturing processes.
- Drive continuous improvement initiatives using proven quality methodologies and data-driven decision making to achieve operational excellence.

JOB REQUIREMENTS

- Bachelor's Degree in Engineering, Materials Science, Chemical Engineering, Manufacturing Engineering, Quality Engineering, or a related field. A Master's Degree is an advantage.
- Preferably with at least 5 years of experience in Quality Engineering role, exposure in Semiconductor, Surface Treatment or Cleanroom industries would be added advantage.
- Experience supporting customer audits and compliance requirements in demanding manufacturing environments.
- Proficiency in quality tools and methodologies such as SPC, MSA, PFMEA, Control Plans, 8D, CAPA, GR&R, and root cause analysis.
- Capable in handling Customer Audit and ISO 9001 Implementation, Lead Auditor certification would be a plus.
- Strong communication and problem-solving skills.

Interested candidates are welcomed to apply online.
