募集要項

Job Summary

We are looking for a bilingual Security Support Engineer to support a large-scale security operations project for a leading Japanese automotive enterprise.

The role involves day-to-day security administration, incident handling, user support, and infrastructure security operations in a Japanese and global environment.

Responsibilities

- Firewall administration and security policy management
- URL filtering whitelist/blacklist management
- Endpoint security operations (AV / EDR monitoring and support)
- Email security administration and investigation
- Security incident handling and troubleshooting
- Active Directory account administration
- User support and security-related inquiries
- Security operations reporting and documentation
- Coordination with Japanese and global teams
- Support for ongoing security improvement activities

スキル・資格

Required Skills

- 5+ years of IT Infrastructure or Security Operations experience
- Hands-on experience with:
  o Firewall o Active Directory
  o Endpoint Security (AV/EDR)
  o Security Incident Handling
  o User Support
- Business-level Japanese
- Business-level English
- Strong troubleshooting and communication skills

Preferred Skills

- Experience in Security Operations Center (SOC)
- Microsoft Defender
- Network Security
- Security Governance / Compliance
- Experience supporting large enterprise environments

Candidate Profile

We are particularly interested in candidates with backgrounds such as:

- Security Engineer • Security Operations Engineer
- SOC Analyst
- Infrastructure Engineer
- Infrastructure Support Engineer
- Technical Support Engineer
- Network Security Engineer

Additional Information

- Immediate interview availability preferred
- Candidates currently working as contractors, consultants, or project-based engineers are welcome
- Candidates with financial, manufacturing, automotive, or enterprise support experience are highly preferred
