.....

B2B向け、とりわけ金融機関やプロフェッショナルファームなどに向けた様々な調査サービスを展開している企業にて、グローバルチーム拡大に合わせバイリンガル人材を積極採用いたします。当該企業では世界規模で精度の高いインサイトを的確にマッチさせることで、スペシャリスト集団である顧客のニーズに応えています。今後グローバル市場でもプレゼンスを高めることで日本にとどらない、グローバルソリューションとしてのプロダクト開発、サービス拡充を図っております。

A Japan-based company providing diverse research services, primarily to financial institutions and professional firms, is aggressively hiring skilled, Japanese/English speaking backend engineers to support the expansion of its global team. The company offers platform and research services to meet the needs of its clients, who are themselves groups of specialists, by precisely matching them with high-accuracy insights on a global scale. As they strengthen its presence in the global market, the company is working to develop products and expand services that function as global solutions, extending beyond the Japanese market.

【概要/Role Overview】

An exciting opportunity for a Senior QA Engineer to lead quality assurance strategies for a global knowledge-sharing platform operating across 190+ countries. In response to rapid platform expansion and the integration of autonomous AI agents, this role will spearhead a team to build robust test automation architecture, and establish continuous testing within CI/CD pipelines across Web, Mobile, API, and AI systems.

【業務例/Responsibilities】

End-to-End Quality Architecture:

- Formulate cross-platform test strategies and drive early-stage quality involvement to catch design defects before development.

Test Automation Frameworks:

- Architect, implement, and maintain scalable test automation suites across frontend, backend, and mobile systems to ensure minimal flaky tests and maximum performance.

Continuous Delivery & Quality Gates:

- Integrate automated regression suites into CI/CD pipelines to streamline deployment verification and accelerate delivery cycles.

AI & LLM Quality Engineering:

- Establish evaluation metrics and automated testing logics specifically tailored for non-deterministic AI/LLM model outputs.

Exploratory Testing & Quality Culture:

- Conduct targeted exploratory testing for edge cases, visualize key quality metrics, and advocate best quality practices across engineering teams.

【Why Apply? - Position PR】

- This will be a great opportunity for an experienced QA specialist to make an impact to the organization and business by taking high ownership of the QA frameworks and the team structure/culture!

Tech Stack/Environment: Power BI, Big Query, Azure Data Factory, ASP.NET Core, Python, Typescript, C#, Azure, GCP, SQL Server, etc

スキル・資格

必須条件/REQUIREMENT

[ネイティブレベルの日本語力をお持ちの方は優遇いたしますが、JLPT N3以上の方も積極的にお会いしております！/ While native-level Japanese proficiency is preferred, we are actively meeting with candidates who have Japanese proficiency of JLPT N3 and higher.]

- 5 or more years of EXTENSIVE professional software testing background
- 3 or more yeas of hands-on experience establishing test automation
- Proven track record in API testing and incorporating automated checks into CI/CD workflows
- Strong practical experience building Web E2E test suites with modern frameworks
- Experience in API testing

有ると望ましい経験・知識/ Nice-to-Have

- Proficiency in TypeScript or C#
- Background in performance, security, or mobile automation testing
- Previous experience in B2B SaaS, marketplace, or high-throughput platform environments
- Experience validating AI/ML model outputs or handling non-deterministic system behaviors
- Holds a testing certificates such as JSTQB, ISTQB, or others

福利厚生・その他

- 社会保険完備
- 交通費支給
- 定期健康診断、オプション費用負担補助
- インフルエンザ予防接種補助
- 有給休暇、年末年始休暇、自己啓発休暇
- 入社祝い金制度
- 書籍購入補助制度
- 借り上げ社宅制度
- 外部セミナー参加補助、その他
