募集要項

DAM (3D Objects) - Senior Consultant
Your Role

This position will primarily be responsible to interface with client and internal key stakeholders; apply technical proficiency across different stages of the 3D
assets project including requirements elicitation, solutioning, solution architecture and design; play an important role in creating the high level 3D assets solution architecture and design artifacts; outlining 3D assets management standards and governance; validating the development process; part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued.

Location: Tokyo

Based on your role, please note that this position may require on-site presence at client premises and/or client locations. Work location and on-site expectations will depend on project scope, phase, and business needs at the time of allocation, with flexibility governed by business and client requirements

Your Key Responsibilities

- Advocate client and provide thought leaderships in 3D assets analytics and engineering
- Understand the requirements both functional and non-functional to define the holistic 3D assets management system architecture
- Demonstrate compelling business values to the client with the 3D assets architecture/solution aligning to the business

scenarios

- Collaborate with the internal stakeholders and outline 3D assets management standards, guidelines, governing principles, and policies aligning to the client requirements
- Identify use cases, 3D assets process flows, outline 3D assets management approach and define assets models
- Specify security, compliance and regulations and access methods aligning to the requirements
- 3D assets reference architecture and framework creation
- Pre-sales activities, proposal creation, solution design and project delivery

Required Qualifications

- Bachelor's degree or foreign equivalent required from an accredited institution. Will also consider three years of progressive experience in the specialty in lieu of every year of education
- At least 15 of experience in Information Technology
- A bilingual resource
- Japan citizens and those authorized to work in Japan are encouraged to apply. We are unable to sponsor at this time
- At least 5 years of experience in 3D assets management

Preferred Qualifications

- At least 10 years of experience in digital assets architecture, Advanced analytics and governance areas
- Experience in gaming industry
- Ability to manage large 3D assets management programs, data design solution and delivery
- Experience in tools like exho3D, Brandfolder, Zoho Lens etc.
- Experience in 3D assets management solution
- Excellent verbal and written communication skills
- Experience in leading teams and managing client expectations
- Experience in software development life cycle. Agile methodology preferred
- Ability to work in team in diverse/ multiple stakeholder environment
- Experience and desire to work in a Global delivery environment

The job entails sitting as well as working at a computer for extended periods of time. Should be able to communicate by telephone, email or face to face. Travel may be required as per the job requirements.
