募集要項

COMPANY OVERVIEW

Our Client Company is a precision manufacturing company specializing in the design, machining, production and assembly of high-precision metal components for the aerospace, semiconductor equipment and industrial automation industries. The company is looking for well experienced Senior Mechanical Design & Product Engineer, to support on product development, process improvements as well technical design solutions.

JOB RESONSIBILITIES

- Develop machining process plans based on technical drawings, specifications, and customer requirements, including tooling and fixture design.
- Manage Engineering Change Notice (ECN) activities and coordinate the implementation of product technical changes.

- Prepare cost quotations for new products and evaluate engineering changes that may impact manufacturing costs.
- Prepare and maintain PPAP documentation, including PFMEA and Control Plans, while ensuring control of critical dimensions and special processes.
- Drive process optimization initiatives to improve manufacturing efficiency, reduce waste, and enhance product quality.
- Support CNC programming activities, manufacturing risk assessments, and root-cause analysis for shop-floor technical issues.
- Maintain technical records and provide engineering support to production teams and external suppliers.

JOB REQUIREMENTS

- Bachelor's Degree / Diploma in Mechanical Engineering, Manufacturing Engineering, or a related discipline.
- Preferably with at least 3 years of experience in Engineering Product Design / Product Development / NPI in manufacturing environment, exposure in precision machining industry would be added advantage.
- Strong proficiency in CAD software (i.e. AutoCAD, SolidWorks, UG/NX) and interest in mechanical design.
- Strong technical and problem solving skills.
- Familiar with APQP, PFMEA, DFM, DOE, GD&T, 5-Why analysis, and fishbone analysis methodologies.

Interested candidates are welcomed to apply online.
