Hanoi

Company Overview
Our client is a well-established multinational technology and telecommunications solutions provider delivering large-scale infrastructure and digital transformation projects across global markets.

Job Responsibilities

- Drive project quality assurance by developing quality plans, conducting inspections, identifying delivery risks, and implementing corrective actions to ensure project quality objectives are achieved.
- Conduct site quality and EHS assessments, ensuring compliance with quality, safety, and environmental standards while monitoring subcontractor performance and site execution.

- Support telecom site implementation through site surveys, technical solution design, and deployment planning for RAN equipment, power systems, grounding, and related infrastructure.
- Coordinate project stakeholders and acceptance activities, including quality audits, issue resolution, documentation management, and final project handover.

Job Requirements

- Bachelor's degree or higher in Telecommunications, Computer Engineering, Computer Science, or a related discipline.
- Solid understanding of mobile network site infrastructure, including indoor, outdoor, and CRAN sites, as well as telecom tower structures such as guyed, self-supporting, and rooftop towers.
- Proficient in AutoCAD and capable of producing site layouts and telecom equipment installation drawings.
- Minimum of 2 years' experience working with major 3G, 4G, or 5G RAN vendors.

Benefits

- Salary is negotiable depending on skills and experience
- Full social and health insurance coverage in accordance with regulations.
- Annual leave in accordance to Vietnamese law

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
