募集要項

Role Summary

The Analyst provides subject matter expertise in financial data, analytics, reporting, and related business information to support the accurate delivery of critical information to internal and external stakeholders. The role contributes to initiatives that enhance data quality, operational efficiency, consistency, and stakeholder experience across global teams. The Analyst serves as a trusted partner to cross-functional teams, supports knowledge sharing, and helps ensure that all information is managed in accordance with internal policies, regulatory requirements, and established procedures.

About the Role

This position is responsible for reviewing, validating, analyzing, and reporting financial and business data while ensuring accuracy, consistency, and adherence to internal policies and applicable regulations. The Analyst develops expertise in reporting tools and data platforms, responds to stakeholder inquiries, and supports a variety of strategic business initiatives and client-related activities.

Key Responsibilities
- Apply analytical expertise to assess, validate, and maintain financial, risk, performance, and business data.
- Produce reports, analyses, and insights related to business activities, data trends, and operational processes.
- Support internal and external stakeholders by responding to inquiries and providing accurate, timely information.
- Build and maintain knowledge of financial products, market developments, business processes, and data governance requirements.
- Identify opportunities to improve data quality, operational efficiency, reporting processes, and stakeholder experience.
- Contribute to projects and initiatives focused on process enhancement, automation, and continuous improvement.
- Coordinate and support responses to business, client, regulatory, and due diligence-related information requests.
- Ensure compliance with internal standards, reporting requirements, and applicable regulatory guidelines.
- Collaborate effectively with cross-functional teams across multiple regions and business functions.
- Organize and manage multiple deliverables simultaneously while meeting deadlines in a fast-paced environment.
- Take ownership of assigned responsibilities and proactively drive work to completion with a high level of accuracy and attention to detail.

Employee Benefits:
In accordance with Japanese labour law

スキル・資格

Qualifications & Experience
Required Qualifications
- Bachelor's degree or equivalent combination of education and relevant professional experience.
- Minimum of 5 years of experience in financial services, investment operations, data analysis, reporting, business analytics, or a related field.
- Solid understanding of financial markets, data management principles, reporting processes, and analytical methodologies.
- Experience working with large datasets and ensuring data accuracy, consistency, and governance standards.
- Strong quantitative, analytical, and problem-solving skills, with excellent attention to detail.
- Ability to manage multiple priorities and deliver high-quality work in a deadline-driven environment.

Preferred Qualifications
- Advanced proficiency in Microsoft Excel and other data analysis or reporting tools.
- Demonstrated experience identifying, designing, and implementing process improvement initiatives.
- Experience supporting projects from planning through implementation, including cross-functional or global initiatives.
- Knowledge of financial data management, analytics, reporting, performance measurement, risk analysis, or related disciplines.
- Experience using financial market data, research, analytics, or business intelligence platforms such as Bloomberg, FactSet, Morningstar, or comparable tools.
- Strong communication and stakeholder management skills, with the ability to build relationships and collaborate across all levels of an organization.
- Ability to coach, support, and influence colleagues in a collaborative team environment.
- Professional certifications such as CFA, CAIA, CIPM, FRM, or other relevant industry qualifications are advantageous.
- Intellectual curiosity and a proactive approach to learning, problem-solving, and continuous improvement.
- Ability to think strategically and commercially when evaluating business challenges and opportunities.
- Strong analytical capabilities, including the ability to interpret complex financial, operational, and business data to support decision-making.
