募集要項

Company Overview

JAC's client, a company in the real estate industry, is hiring for an Assistant Manager, DX Strategy position.

This role offers a unique opportunity to contribute to both digital transformation initiatives and enterprise IT strategy. Working closely with local business teams and overseas stakeholders, the successful candidate will play a key role in enhancing operational efficiency, managing internal IT infrastructure, and delivering technology-driven business improvements.

Job Description

- Support the development and execution of digital transformation strategies in collaboration with business stakeholders and overseas teams.
- Coordinate with internal departments and external stakeholders to develop, maintain, and manage IT infrastructure, including networks, devices, user accounts, and related systems.
- Lead or support system development initiatives aimed at improving business operations through digital technologies.

- Manage project activities including planning, requirements definition, implementation support, project coordination, and progress tracking.
- Troubleshoot infrastructure-related issues independently or in coordination with vendors and service providers.
- Provide technical consultation, system-related guidance, and digital technology support to business departments.
- Support departmental operations through coordination activities such as scheduling, meeting arrangements, documentation, reporting, translation, and communication among multilingual stakeholders.

Qualifications

- Bachelor's degree or above.
- More than 5 years of experience in the IT field.
- Practical experience in system development, including design, programming, testing, and implementation activities.
- Experience in business transformation initiatives, systemization planning, requirements definition, and project management.
- Strong communication skills in both Japanese and English, including speaking, reading, and writing.
- Experience managing system development projects from planning through implementation is preferred.
- Experience supporting and managing internal IT infrastructure, including PCs, mobile devices, networking equipment, user IDs, and accounts.
- Knowledge of Microsoft technologies and services such as Azure, Microsoft 365, and Exchange.
- Vendor certifications related to AWS, Azure, Cisco, Juniper, or equivalent technologies are advantageous.
- Familiarity with statistical analysis, forecasting, mathematical optimization, machine learning, or related technology fields is a plus.
- Experience in the real estate sector is advantageous.
- Strong sense of ownership, accountability, teamwork, and continuous improvement.
- Ability to work independently, take initiative, manage priorities, and meet deadlines.
- Willingness to learn new technologies and expand responsibilities over time.
