募集要項

About the role
The Post-Tensioning (PT) Engineer role offers an excellent opportunity to contribute to the design and delivery of complex structural projects. This position is suited to a hands-on engineer who is confident working independently and has strong experience in PT transfer slab design, particularly within projects aligned to Australian standards.

Responsibilities

- Deliver post-tensioning transfer slab design solutions for structural engineering projects.
- Apply relevant Australian design standards, including NSW requirements, throughout the design process.
- Produce accurate and practical engineering designs that meet project objectives and technical requirements.
- Work independently to manage design tasks and deliver high-quality outcomes.
- Support the successful delivery of projects through sound engineering judgement and technical expertise.

- Collaborate with project stakeholders where required to ensure design quality and compliance.

Requirements

- Solid experience in post-tensioning (PT) transfer slab design.
- Approximately 2 to 4.5 years of relevant engineering experience.
- Good knowledge of Australian design standards, particularly NSW requirements.
- Ability to work independently with minimal supervision.
- Practical, hands-on approach to engineering and problem-solving.
- Strong technical competence and attention to detail.

About the company
A company in the engineering consultancy industry, this organisation delivers specialised engineering solutions across a range of structural projects. As part of a multinational environment, it is known for its commitment to technical excellence, quality design, and professional standards.
