募集要項

About the role
Our client is seeking an Electrical Control Leader to support automation and control system activities within a manufacturing environment. The role will focus on PLC programming, troubleshooting, machine improvements, and supporting production equipment reliability.

Responsibilities

- Perform PLC programming, modification, and troubleshooting activities.
- Support machine automation and electrical control system improvements.
- Monitor and maintain sensors, instrumentation, and industrial control systems.
- Analyze electrical and automation-related issues and implement corrective actions.
- Coordinate with Production, Maintenance, and Engineering teams to improve machine performance.
- Support continuous improvement initiatives related to automation and production efficiency.

Requirements

- Minimum Diploma (D3) in Electrical Engineering, Electronics Engineering, Mechatronics, Industrial Automation, or related fields.
- Minimum 3–5 years of experience in Electrical Control, PLC, Automation, Sensors, or Industrial Control.
- Strong PLC programming and troubleshooting skills.
- Good understanding of sensors, instrumentation, and industrial automation systems.
- Good English communication skills.
- Able to work independently and collaboratively within a team.
- Willing to work in Cikarang, Bekasi.

About the company
A company in the automotive component manufacturing industry. The company operates as part of a Japanese manufacturing group and supplies components to the automotive industry through advanced production and engineering operations.
